UNIFORM CRIME REPORTS

J. Edgar Hoover, Director, Bureau of Investigation

United States Department of Justice

Washington, D. C.

Volume 1

AUGUST, 1930

Number 1

SPECIAL ANNOUNCEMENT

By an act of Congress approved June 11, 1930, the National Division of Identification and Information of the Bureau of Investigation of the United States Department of Justice was granted authority to collect and compile crime statistics. Effective September 1, 1930, the bureau assumed this work which had been handled since January 1, 1930, by the Committee on Uniform Crime Records of the International Association of Chiefs of Police. During the period indicated, monthly bulletins of crime reports were published by that committee. The Bureau of Investigation plans to continue the monthly bulletins published heretofore, based for the present on the Return A forms of "Offenses known to the police" and this bulletin reflects the returns for the first month as compiled by the bureau.

All contributions of crime data to the Bureau of Investigation are purely voluntary, solicited solely for the purpose of making available statistical information concerning crime to those officially interested organizations and individuals who desire to receive and analyze these statistics. All chiefs of police who have not submitted the Return A forms are invited to do so. The necessary blank forms and the manual Uniform Crime Reporting will be furnished upon request. The manual mentioned, published by the International Association of Chiefs of Police, contains instructions for the preparation of the reports.

At this time the attention of contributors of crime data is invited to the practice prevailing in certain States whereby the State bureau of identification or other similar agency compiles the crime returns and transmits the reports to this bureau. Through the medium of State control, greater accuracy and comprehensiveness will be assured. This practice has been adopted by the States of Ohio and Utah and the results have been encouraging. A report has been received from Ohio indicating that the returns for June and July covered municipalities containing 97 per cent of the total population of all cities in the State, as well as rural territory containing over 60 per cent of all population outside of the cities, together comprising over 83 per cent of the total population of the State. It is noted that these results have been achieved through the cooperation of The Ohio Institute, the State division of identification and the law enforcement agencies over a period of six months on a voluntary basis without supporting compulsory legislation. The suggestion is made that other States, through their bureaus, may desire to assume the responsibility for a similar state-wide compilation of crime returns.

Every effort will be exerted by the Bureau of Investigation to secure from its contributors statistics which are not only accurate, but which will become more comprehensive as time goes on and the methods of compilation are more widely and thoroughly understood. All correspondents are asked to cooperate in this endeavor. The usual monthly forms will be mailed hereafter, as in the past, with the bulletins covering the returns for the previous month and it is requested that such forms, when completed, be returned to the bureau by the seventh day of the next succeeding month. The prompt transmittal of these returns will obviate the necessity for publishing supplemental figures.

Any and all suggestions which officials and interested persons desire to submit to this bureau on the subject of crime reporting will be appreciated and will receive careful study.

Correspondence relating to crime statistics should be addressed to J. Edgar Hoover, Director, Bureau of Investigation, Department of Justice, Washington, D. C.

Offenses Known Tabulated for Larger Cities.

This number of the bulletin contains the reports of "offenses known to the police" during the current month, as shown by returns received from the reporting areas; also supplementary returns for previous months. In addition, current returns for cities of 100,000 population and over, according to the latest available 1930 census population data, are separately tabulated. Reviews of the extent of the crime registration area and of crime trends are included, as well as a complete tabulation of the number of police department employees for all reporting cities for which the information is available.

"Offenses known to the police" include all crimes occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to a group of seven classes of grave offenses, shown by experience to be those most generally and completely reported, and constituting Part I of the Uniform Classification of Offenses. They include *all known crimes* in the designated classes, and not merely arrests or cleared cases. Thus they provide an index to the volume, geographic distribution, and periodic fluctuation of these crimes.

Increase in Size of Reporting Area Continues.

The continuous extension of the crime registration area which has characterized each month of operation of the system of uniform crime reporting is maintained for August also. Returns from 768 cities, located in 44 States, have been filed for the month. In addition, a number of State and county returns have been received, including 50 Ohio counties and 11 Utah counties. Alaska and Porto Rico are also represented for August, and supplementary returns have been submitted from Honolulu and the Philippines.

The size of the registration area for crime reporting has more than doubled in the short period of eight months. The number of cities in the continental United States alone which have submitted voluntary returns on crime for any one month or more has grown from 400 in January to a total of 895.

In the table which follows, the distribution of such cities by population groups is shown for cities of 10,000 population and over. As

the final official count of the 1930 census figures has not yet been completed, the 1920 census has been employed for all population data as being the best now available for comparative purposes. The table does not include 382 additional cities having a population of 10,000 and under, which are filing returns but for which it has not proved feasible to show population percentages. The combined population of the latter would be well over 1,000,000. The total population of the territories and possessions reporting since January is in excess of 1,500,000.

Population groups	Total number of cities	Cities filing returns		Total population (1920)	Population represented in returns	
		Number	Per cent		Number (1920)	Per cent
Total.....	746	513	70	44,702,858	32,991,280	74
A. Cities over 200,000.....	33	30	91	22,712,830	16,303,823	72
B. Cities 100,000 to 200,000.....	35	30	86	4,706,406	4,048,159	86
C. Cities 50,000 to 100,000.....	76	60	79	5,285,747	4,277,200	81
D. Cities 25,000 to 50,000.....	143	109	76	5,075,039	3,924,549	77
E. Cities 10,000 to 25,000.....	459	284	62	6,942,746	4,337,459	62

As recently as September 3, 1930, preliminary figures for cities of 100,000 inhabitants or more were issued by the Bureau of the Census. These are subject to subsequent revision in the final count. A and B cities in the preceding table have been tentatively reclassified in accordance with the 1930 census figures so far issued, and the number and per cent of such cities now filing crime returns, together with the number and per cent of the population represented, appear as follows.

Population groups	Total number of cities	Cities filing returns		Total population (1930)	Population represented in returns	
		Number	Per cent		Number (1930)	Per cent
Total.....	94	82	87	36,494,406	27,291,847	76
A. Cities over 200,000.....	41	36	88	29,711,511	21,330,419	72
B. Cities 100,000 to 200,000.....	53	46	87	6,782,895	5,961,428	88

Cities Urged to Send in Supplementary Returns.

The extent of the reporting area by State distribution of cities is shown in the following table. The monthly number of reporting cities has increased from the original 400 in January to a total of 768 in August. By the process of collecting supplementary returns for back months from cities cooperating after January, when the work was initiated, gaps in the records have been filled and a monthly average of nearly 750 returns from January to August, inclusive, has been attained. Cities lapsing in any one month and cities commencing to send in returns after January are urged to complete their returns by sending them in for missing months, thus maintaining for the entire reporting period the extended reporting area which has been established. The importance of this will be readily seen when it is realized that as a rule only cities that have sent in a complete set of returns can be included in any extended statistical treatment. It

is to be noted in connection with the figures which follow that those for January, February, March, April, May, June, and July include all late or supplementary returns for these months, whereas those for August represent the initial returns only. Presumably the total for August will be considerably augmented by supplementary returns, as in the case of the earlier months.

Monthly Crime Trends Depicted for Leading Cities.

The purpose of the chart on trends of crime shown on the opposite page is to depict the volume and monthly fluctuations of crime both as a whole and for the different offense classes. All cities in the continental United States of 100,000 population and over, according to the most recently available 1930 Census Bureau data, which have submitted comparable monthly crime returns for the period covered, January to August, inclusive, 1930, form the unit for which monthly trends are shown. In order to avoid the effect of variations in the length of the months represented, the figures plotted represent the average daily number of offenses for each month, rather than the monthly totals of offenses. The chart has been drawn to logarithmic scale in order to present a more accurate comparison of the monthly trends. The crimes included are the offenses in Part I of the Uniform Classification of Offenses.

CHART OF MONTHLY CRIME TRENDS
FOR CITIES OF 100,000 POPULATION AND OVER
JANUARY TO AUGUST 1930

Percentage of Offenses Known Continues Comparatively Stable.

The monthly per cent of each offense class to the whole is shown in the following table. It is based on the totals for all offenses reported, as derived from the returns for January, February, March, April, May, June, July, and August, 1930.

Per cent of offenses known

Part I classes of the uniform classification	January	February	March	April	May	June	July	August
Total.....	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Murder and non-negligent manslaughter.....	.5	.4	.5	.5	.5	.5	.6	.6
Manslaughter by negligence.....	.5	.3	.4	.4	.5	.4	.4	.4
Rape.....	.6	.3	.4	.4	.4	.6	.5	.5
Robbery.....	7.9	6.8	6.0	4.9	4.5	4.9	4.8	5.3
Aggravated assault.....	4.1	3.8	3.5	3.7	4.5	4.2	4.3	4.6
Burglary—breaking or entering.....	20.6	21.4	20.9	20.7	20.1	19.8	20.1	19.9
Larceny— theft: \$50 and over.....	8.6	8.6	8.2	8.6	8.8	9.2	9.5	9.1
Larceny— theft: Under \$50.....	32.3	31.4	31.8	32.8	32.8	32.9	34.0	34.6
Auto theft.....	24.9	27.0	28.3	28.0	27.9	27.5	28.8	28.0

Total Volume of Offenses Increases Slightly in August.

A comparison of the total of all reported offenses known to the police for the month of August, according to returns received by the Bureau of Investigation, with the total for the same cities for the previous month, indicates a net increase for the current month. This increase is slightly less than 10 per cent, and is most apparent in the reported offenses of robbery and aggravated assault.

Regularity in Preparing Returns Improves.

A steady improvement in the manner of filling in the monthly return forms has been noted. Attention is directed to the following:

1. The total number of police department employees, including civilians, should be entered each month, regardless of whether the number continues practically unaltered from month to month.
2. No postage stamp is required in using the return envelope provided for remitting returns.

TABLE I.—Number of offenses known to the police, August, 1930

¹ Not classified; included in total.

Total Police Department Employees Tabulated.

The number of police department employees for cities of 10,000 population and over according to the 1930 census was published in the July issue of Uniform Crime Reports. The same information for cities of under 10,000 population is presented in the current issue. It has been deemed advisable to republish in this issue the tabulations for cities of 10,000 population and over, so as to assemble in one place the entire figures for all cities for which they are at present available. This gives opportunity also for a thorough revision and extension of the table published in the July bulletin. In a number of instances additional census figures are now available; in others, revised figures have been issued by the Census Bureau and are substituted for those printed last month. A number of cities have submitted data on department employees only since the printing of the last bulletin.

Information as to the number of department employees is taken direct from Return A, the monthly return of offenses known to the police, as submitted from January to June, inclusive, of 1930. A representative number for each department has been selected, based on either the predominating entry for the months included, or an average taken from such entries where there is some variation from month to month. The number of employees *includes civilians*, in addition to the regular force, in all departments where civilians also are employed. The population data are current and are taken direct from the most recent 1930 releases of the United States Bureau of the Census. As these are not entirely complete at the moment of going to press, some cities are necessarily omitted, while the population figures for others are subject to later revision. For comparative purposes, the cities are classified into six population groups, namely, those of over 200,000, 100,000 to 200,000, 50,000 to 100,000, 25,000

to 50,000, 10,000 to 50,000, and those of under 10,000 population. The number of employees per 1,000 population is also shown. Over 700 cities are represented, and omissions are in most cases due either to the fact that (1) the city in question has failed to specify its number of police department employees on the monthly return forms; or (2) 1930 population figures are not available at the moment of going to press.
